

WE'RE NOT SURE HOW

THE WORLD'S BIGGEST PROBLEMS WILL BE SOLVED

BUT WE DO KNOW

THE SOLUTION IS GOING TO START WITH

“WHAT IF WE...”

What if we moved that. What if we changed this. What if we adjusted the variable. Controlled the other. What if we looked at it this way. Focused on those instead of these. What if we added that, or eliminated everything. It's called creative problem-solving. It happens across disciplines, from the most scientifically rigorous pursuits to every intuitive process. It's a critical ingredient in the world today, and the good news is, it can be taught. Right here in our schools. Every day. It starts with creativity itself, an element that oft gets overlooked in these days of budget slashing and achievement testing.

But we can't let that happen here in Marin. We believe in rich arts, technology, literary and health programs. Programs, we might add, that are generally not subsidized by the state or the nation. Programs that exist solely because Marin is made up of passionate people who believe in the power of creativity.

We are *SchoolsRule*, a group of dedicated public school foundations who have partnered with the Marin County Office of Education to help provide all the public school kids of Marin with the very best educational opportunities.

Regardless of ZIP code.

But, it doesn't work without your help. It's simple: In an effort to support Marin public schools, you donate money; we take that donation and distribute it on a per-student basis.

Every community benefits and every kid gets to take a step back from the edge.
